

## **Topic: Risk management in information and technology projects.**

**Deadline: 23-11-2022**

**Topic for Research Project.** Please select a topic from the Project Management latest research area. You must demonstrate conceptual understanding of project management principles when you select a topic. You must be able to address at least one of the followings:

- Provide understanding about the topic and relate the topic with project management principles
- Discuss why your selected topic is important in Project Management.
- Provide answers to what could be the grand challenges of Project Managers in that specific field.
- Provide answers to what could be the future consideration in that specific areas.
- Discuss how project management students can improve themselves to address these challenges in that specific area.

### **Research Project Report Requirements**

*Please write your research paper report according to following format:*

1. Introduction
2. Brief literature review about Project Management concept in that specific area.
3. Discussion about the selected topic (identified above)
4. Conclusion
5. References (Please use Chicago format)

*Format:*

1. The length of the research paper should be somewhere in the range of 8-12pages. (Exclude references)
2. Please use 12 point as sizing
3. Please use your own words when you are writing. Do not copy and paste from the references.
4. Please cite **at least 8** journal articles in recent 5 years.

*Grading:*

The research paper report will be evaluated on these primary areas:

- Demonstrate conceptual understanding of project management principles.
- Demonstrate graduate level of writing.
- Demonstrate your ability to make judgement about the specific topic as a project manager.
- Demonstrate your critical thinking ability and graduate-level research capability.

Present results in a well-organized and compelling written document.

1. **Response Content:** The degree to which the writing response demonstrates understanding of basic course concepts presented in the course text and class sessions.
2. **Response Depth:** The degree to which the requirement response demonstrates sophistication in thinking, synthesis, and application of concepts developed in the course.
3. **Response Organization:** The effectiveness of the response in providing clear organization, well-developed support, and consistent logic for arguments and positions taken.
4. **Written Presentation:** The degree to which responses are “cleanly” written and it should be graduate level (free from errors in usage, citation, spelling, etc.).
